GO TURNER

The Aspire Go Turner is a compact, carer-assisted aid for seated transfers, such as from bed to wheelchair. It is suitable for users who can bear weight, stand with support, and maintain balance. An optional standing sling provides light support during sit-to-stand movements, helping to keep the user stable. A professional assessment is recommended to ensure safe use.

Designed for tight indoor spaces, the Go Turner features a narrow frame and works best on flat surfaces over short distances. It folds down and disassembles easily for convenient storage and transport. Reliable and space-efficient, the Aspire Go Turner is ideal for Homecare, Aged Care, and Acute Care environments.

Ergonomic Handlebar

Sling-retention Clips

Large range of sling belts (S to XL) for improved support and positioning

Knock-down Design

Easy transport and storage

Angle and Height-adjustable

Knee pad offer comfort during transport

Spacious Footplate

6 x Wheels for improved stability
