G. Fixing screw (2)
H. Knurled nuts (2)
I. Rear support
J. Adjustable holders (2)
K. Supports (4)
L. Hygiene openings

WEIGHT CAPACITY: 300 LBS /136 KGS

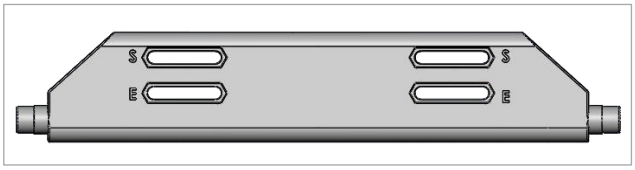

ASSEMBLY

1. Remove existing toilet seat and lid assembly

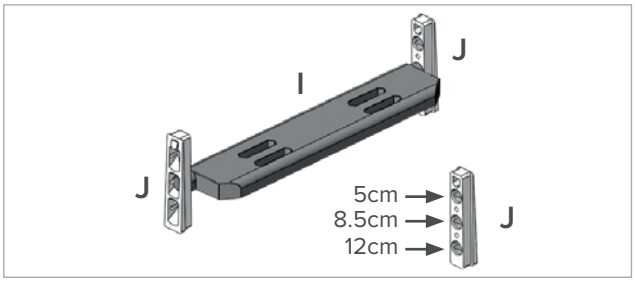

2. Place rear support **(I)** on toilet bowl and attach at required length based on your toilet shape using fixing screws **(G)** and knurled nuts **(H)**.

   NOTE: There are letter indicators on the rear support **(I)** marked “E” for Elongated and “S” for Standard to assist with which hole to thread the fixing screws **(G)** through for your toilet shape.

3. Insert adjustable holders **(J)** onto the rear support **(I)** at the desired seat height.

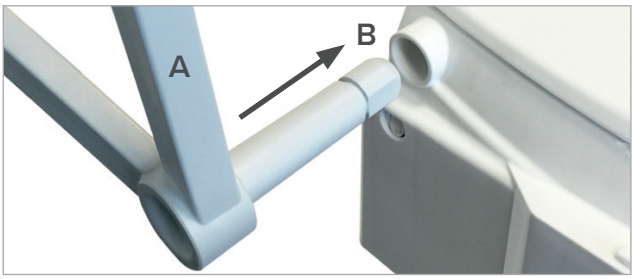

4. To set the height in the front, insert the supports **(K1)** in the corresponding opening until they click into place.NOTE: Be sure that the supports **(K1)** are inserted at the same height on the right and left side. The supports **(K1)** can be set lower than the rear support **(I)**.

5. Insert supports **(K2)** in the corresponding openings until they click into place.

6. Push armrests **(A)** into the armrest holders **(B)**. If not using armrests, skip this step.

7. Slide body **(D)** of raised toilet seat onto adjustable holders **(J)** until you hear a click into place.

HEIGHT ADJUSTMENT

The raised toilet seat can be adjusted using the adjustable holders **(J)** for an elevation of 5cm, 8.5cm and 12cm.
If you wish to change the seat height, follow these steps:

1. Push the locking tabs on the right and left under the armrests **(A)** and pull the body **(D)** of the raised toilet seat up.

2. Pull out the adjustable holders **(J)** and set the desired height. To do this insert the rear support **(I)** into the corresponding hole in the adjustment holder **(J)**. Be sure that the adjustable holders **(J)** are set at the same height on both the left and right sides.

3. To adjust the height in the front, insert the supports **(K)** into the corresponding openings until you hear them click into place. Be sure that the supports **(K)** are set at the same height on both the left and right sides.
NOTE: The supports **(K)** can be set lower than the rear support **(I)**.

4. Set the body **(D)** of the raised toilet seat back onto the rear support **(I)**.
