HEALTHCARE EQUIPMENT

4H175E Electric Paediatric Cot

This cot is thoughtfully designed for paediatric care and caregiver convenience, offering features that improve safety and efficiency in hospital settings.

Easy-to-Operate Side Rails: The side rails are easy to operate with one hand, enhancing patient safety and allowing quick adjustments, even when multitasking.

All-Around Access: The open base design allows access from all sides, making patient care easier and reducing the risk of injury.

Height Customisation: The electric height adjustment makes it easy to position the cot at the right level for both patient comfort and caregiver convenience.

Emergency-Ready Positioning: The cot can quickly tilt up to +12 degrees for emergency situations. For stability, use the manual release lever to return the cot to a flat position instantly.

Integrated Battery Backup System: The battery backup ensures that height and tilt adjustments can be made during power outages, providing consistent care in all situations. It's not intended for long-term cordless use.
