HEALTHCARE EQUIPMENT

Whill C2 Custom Backrest
Cane Assembly

INSTALLATION

Installing these canes is quick and easy, with adjustable width of 16-20” provided for aftermarket backrests to be fitted.

The standard configuration stands at 300mm in height, accommodating most common backrest heights. If there is a need for a taller backrest, this design allows for a seamless upgrade: simply replace the vertical upright with a 500mm tube to increase the height of the backrest cane assembly.

PRODUCT FEATURES

Suits most aftermarket backrests

Width adjustable – Suits 16 - 20” backrests

Height adjustable – Taller backrest upright allows installation of taller custom backrest cushions
